Art. Unit. 351

The drawings are objected to because Figures 1-10 of the drawings have not been provided. Correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention. Page 27 of the specification is missing. Also the brief description of the drawings should follow the heading and not be referred to as being on other pages of the specification. Also, the heading of REFERENCE NUMERALS IN THE DRAWINGS, pages 22-25 is not necessary and should be canceled. Further, Applicants specification is unduly lengthy and should be shortened by canceling the unnecessary discussions of details which are not pertinent or critical to the understanding of the invention. An application of a patent is suppose to include only what is necessary for a complete understanding of Applicant's invention.

Claims 1-28 are rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification.

Art Unit 351

Claims 1-28 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. § 112.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. However, the claims are considered to patentably define over such art.
